Montessori Learning Areas

Practical Life

Practical Life is designed in helping children ages three (3) and four (4) to develop and refine their sensory perception and motor development skills. The child creates an understanding of his or her environment, how the environment works and the importance of these activities in helping the child to develop manual dexterity.

Sensorial

Sensorial Education focuses on the understanding of how children ages three (3) and four (4) learn through sight (colour, dimensions and shapes), hearing (tone and pitch), touch (texture, weight, temperature, size and shape), smell and also taste.

Mathematics

Mathematics provides information and practical hands – on use of manipulative materials in helping children ages three (3) and four (4) learn to count, add, subtract, multiply and divide. The sequences take children from a state of working with concrete manipulative materials to working on an abstract symbolic level.

Language

Language covers the learning sequence from the basic phonetic sounds to phonograms and symbolic grammar exercises which develops comprehension and improves understanding of language.

Cultural Studies

Children have a great curiosity about the world we live in. Without a good knowledge of Cultural Studies, it will be impossible later on to get a clear idea of the relationship between Zoology, Botany, Geography and History. We may consider Cultural Studies as the foundation for other parts of knowledge and it is a subject in which the children show great interest.

Arabic Montessori Learning Areas

Surah And Doa'

Surah and Doa' focus on the pronunciations through individual recitation. It will aid the children to perform their daily prayers in the future and recite the Doa's fluently.

Arabic Sensorial

Arabic Sensorial exposes the children to basic Arabic words. They are taught the Arabic names of colours, shapes, sizes and texture. These activities expand their vocabulary in the Arabic Language.

Al - Arqam

Al - Arqam is an area where the children are taught to count in Arabic. They will first be taught on quantifying, followed by recognising the numerals. Indirectly, the child will also learn how to write the Arabic numerals through the materials provided such as the tactile numbers. They are also conditioned to start counting from right to left.

Huruf Hijaiyyah

Huruf Hijaiyyah is introduced through the recognition of individual huruf and sounds. It is a hands - on tactile experience for this area and they are taught to read the huruf from right to left. In addition, it prepares the children for reading and writing in Arabic.

Practical Solat

Practical Solat introduces the children to the five (5) daily prayers. They begin with Practical Wudhu' whereby the mudarrisahs will assess them following the steps of wudhu' individually. Recitation of Doa's and Niats will be followed by the practical movements such as the Sujud, l'tidal till Salaam.

Malay Montessori Learning Areas

Education is a natural process
carried out by the human individual,
and is acquired not by listening to words,
but by experiences in the environment
