# Montessori Learning Areas

## Practical Life

Practical Life is designed in helping children to develop and refine their sensory perception and motor development skills. The child creates an understanding of his or her environment, how the environment works and the importance of these activities in helping the child to develop manual dexterity.

## Sensorial

Sensorial Education focuses on the understanding of how children learn through sight ( colour, dimensions and shapes ), hearing ( tone and pitch ), touch ( texture, weight, temperature, size and shape ), smell and also taste.

## Mathematics

Mathematics provides information and practical hands – on use of manipulative materials in helping children learn to count, add, subtract, multiply and divide. The sequences take children from a state of working with concrete manipulative materials to working on an abstract symbolic level.

## Language

Language covers the learning sequence from the basic phonetic sounds to phonograms and symbolic grammar exercises which develops comprehension and improves understanding of language.

## Cultural Studies

Children have a great curiosity about the world we live in. Without a good knowledge of Cultural Studies, it will be impossible later on to get a clear idea of the relationship between Zoology, Botany, Geography and History. We may consider Cultural Studies as the foundation for other parts of knowledge and it is a subject in which the children show great interest.
